

Portfolio

Portfolio Website – Main Requirements

1. General

- The website must be **fully dynamic**, with **no static or hard-coded content**.
 - All displayed content must be retrieved from a database and managed through an admin panel.
 - The website must be **responsive** and function properly on desktop, tablet, and mobile devices.
 - The website must be **hosted online** (local-only projects are not acceptable).
 - The website must support **two languages (bilingual)**, with the ability to switch languages.
-

2. Admin Functionality

- A **secure admin login system** must be implemented.
 - After login, the admin must have access to a **dashboard**.
 - From the dashboard, the admin must be able to:
 - Add, edit, and delete:
 - Skills
 - Projects
 - Work experience
 - Education
 - Resume
 - Contact information
 - Hobbies
 - All changes made by the admin must be reflected immediately on the public website.
-

3. Public Pages

- **Portfolio pages** displaying:
 - Skills
 - Projects
 - Work experience
 - Education

- Resume → be able to download the CV
 - Hobbies
 - **Contact Page**
 - Users must be able to send messages directly through a contact form.
 - Messages should be stored in the database and accessible by the admin.
-

4. Testimonials

- A **testimonial page** where users can submit testimonials.
 - Testimonials must not be published automatically.
 - The admin must be able to:
 - Accept (approve) testimonials
 - Reject testimonials
 - Delete testimonials
 - Only approved testimonials should be visible to the public.
-

5. Technical Expectations

- Proper authentication and authorization for admin access
- Clean UI/UX design
- Secure handling of user input (validation and sanitization)
- Clear separation between admin and public views
